Insights

Powerful change starts with powerful visibility

An Integrated Snapshot of the Ethical Health of Your Culture

True ethical health analysis requires being able to see the big picture. Relying on out-of-context reports from disconnected applications and manual processes, prevents you from gaining the critical information necessary for a comprehensive view.

Unfortunately, many ethics and compliance professionals struggle to see correlations between their reported case incidents and their overall business performance.

E&C leaders can use integrated data analysis to drive decision making.

- View company-wide incidents, campaigns and disclosure KPIs in centralized dashboards.
- View hot spots and dark s pots of risk with geographical heat maps.
- Interact with our collection of dashboards and benchmark data that enable our customers to analyze and improve their ethics and compliance programs from both an operational and effectiveness standpoint.
- Analyze trends and underlying root causes for any time range. Gain insight from your data to distill the right message to your board and C-suite.

Convercent Insights has provided us with actionable data, no matter what type of information and format, we can now do it.

Deep interactions and analytics

Equipped with comprehensive data and strategic analysis tools, E&C professionals can lead proactively and promote positive change in their organizations. Additionally, Convercent Insights helps professionals to reduce time spent preparing board reports from weeks to minutes because they’re armed with compelling visualizations that track their program effectiveness.

- **Understand** where disconnects exist in company culture
- **Obtain visibility** into gaps in internal controls and processes for high risk areas
- **Identify risk areas** where your brand may be exposed
- **Make insightful decisions** that lead to proactive intervention
- **Demonstrate the value** of your program to the board and elevate the visibility of your E&C program
- **Identify the root causes** of the employee behaviors causing to ethical challenges

Discover Insights Benchmarking

Convercent provides the first embedded real-time benchmarking tool for ethics & compliance professionals allowing them to understand where they stand in comparison to other departments within their organization as well as in relation to similar companies. Access to benchmarking data gives context to your existing reporting and allows leaders to begin to look deeper into their data & provide quantifiable comparison analysis justifying conversations for additional investment or ethics & compliance strategy shifts with their board.
